INSTALLATION AND MAINTENANCE

- Using an epoxy-based adhesive or polyurethane glue is recommended
- Trim pieces should be installed without spacers - grouting is not required
- It is recommended to immediately remove grouting residue from the trim pieces using a non-abrasive sponge and gentle cleaning products - this will prevent grout hardening and the consequent need for acidic cleaning products
- Avoid harsh, acid-based cleaning products as they will damage the surface
- Always inspect material prior to installation, installed material cannot be accepted for return or credit
